

TEDDY UMBA MUBA

QA TEST ENGINEER

ABOUT ME

- Energetic, dedicated, passionate, fast learner and meticulous when testing software/hardware engineering systems.
- Fluent in English, French, Swahili and Lingala

WORK EXPERIENCE

Software QA Engineer : GoMaterials, Internet Marketplace Platforms, Montreal, Quebec.

May 2023 - Present

- Continuously ensuring the product achieves or exceeds the envisioned customer experience.
- Responsible for developing quality strategies for products and overseeing the development and execution of software test plans and analysis of test results.
- works closely with other functional disciplines, especially development and product teams.
- Responsible for strategy and prioritisation of test automation solutions for Web platforms and backend services.
- Responsible for coordinating releases across various teams as well as ensuring that quality gates are met before feature deployment.
- Ensure delivery against QA department goals and objectives, i.e. meeting commitments and coordinating overall quality assurance schedule.
- Participating in product testing (both manual and automation test development).

Software QA Test Engineer : Takealot online (Pty) Ltd, Mr D

April 2019 - April 2023

Automation Testing

- Independently developed a Page Object Model (POM) framework with Selenium and TestNG | Cucumber BDD using Java with Database validation.
- Independently developed an API testing framework (REST-assured| Hamcrest).
- Integration of all front-end automation frameworks on CI tool i.e. Jenkins, Bamboo.
- implementing Allure reporting tool on existing frameworks allowing for visibility of automated test results.

Manual Testing

- Analysing the business requirements and system specification documents, creating and executing test cases in Jira (X-Ray, TestRail integration).
- Logging bugs and communicating with the team about issues, investigating bugs reported by customers.
